

Piotr Romanczuk

SOFTWARE ENGINEER

p.romanczuk@gmail.com | +48 513 602 768 | Warsaw, Poland | github.com/PiotrRomanczuk | romanczuk.vercel.app

SUMMARY

Full-stack software engineer with production experience building SaaS applications end-to-end. Delivered 3 production apps with TypeScript, React, Next.js, and Supabase — including a CRM serving 20–30 daily users and an Instagram automation platform with 650+ tests. Hands-on with CI/CD pipelines, Docker, PostgreSQL, and cloud deployments across Vercel and Railway.

SELECTED PROJECTS

Guitar CRM (Strummy) — strummy.vercel.app

- Production SaaS serving 20-30 daily active users -- student management, lesson scheduling, practice tracking
- 5-stage CI/CD pipeline: lint, typecheck, unit tests, build, deploy via GitHub Actions
- Spotify-enriched song library with circuit breaker + 8-strategy fuzzy matching
- Bidirectional Google Calendar sync with SSE streaming
- 9 AI agents (OpenRouter + Ollama) for lesson planning and content generation
- 50+ RLS policies, event-driven notification pipeline, 1,100+ tests across 7 device profiles

TypeScript, Next.js, Supabase, Spotify API, Google Calendar, OpenRouter

Instagram Stories Webhook — stories-webhook.vercel.app

- SaaS for programmatic Instagram Story publishing with swipe-to-approve review queue
- 3-tier video pipeline: FFmpeg.wasm client validation -> server transcoding -> signed-URL uploads
- CI pipeline: lint, typecheck, tests, build gate, automated code review
- Meta Graph API 3-step container flow with error classification and retry logic
- Drag-and-drop calendar scheduling with Supabase realtime sync
- 656 unit tests, 113 E2E tests, 35 releases with structured changelog

TypeScript, Next.js, Supabase, Meta Graph API, FFmpeg, Vercel Cron

EXPERIENCE

01.2026 — Present — Data & Research Coordinator — Adminexpol Michal Marszal

Executing data-driven market research and analysis to identify trends and inform digital strategy. Orchestrating multi-channel content distribution workflows, ensuring the seamless synchronization and deployment of visual assets from Instagram to diverse social media ecosystems to maximize brand visibility.

2021 — Present — Software Engineer & Entrepreneur (Self-taught)

Built and operated 3 production apps end-to-end: architecture, databases, APIs, CI/CD, and deployment. Self-taught through TypeScript, React, Next.js, and cloud services.

2022 — Present — Guitar Teacher

Built a custom CRM (Strummy) for 20-30 active students. Runs on self-managed infra with automated deployments.

2020 — 2022 — PC Sales Specialist

Technical consulting on custom PC builds. Strong troubleshooting and communication skills.

2015 — 2020 — International Chef

High-pressure, multi-country environments (Poland, Ireland, Netherlands). Cross-cultural communication and adaptability.

SKILLS

Languages: TypeScript, JavaScript, Python, Bash, C# (.NET 9), SQL

Frontend: React, Next.js, Tailwind CSS, Framer Motion, HTML5 Canvas

Backend: Node.js, Supabase/PostgreSQL, REST APIs, WebSocket, SSE

Cloud: Vercel, Railway, Supabase

CI/CD: GitHub Actions, Vercel CI, Automated Releases, Semantic Versioning

Databases: PostgreSQL, SQL Server, Supabase RLS

Testing: Jest, Vitest, Playwright, E2E Automation

Tools: Git, Linux CLI, ESLint, Docker, npm

Spoken: Polish — Native, English — C1 (IELTS)

EDUCATION

IU University of Applied Sciences — Software Development (in progress)
